## BitDefender Free Edition

BitDefender Free Edition is an on-demand virus scanner which incorporates the award-winning BitDefender scanning engines. For users unwilling to mess about with more complicated products, BitDefender Free Edition provides a modicum of security in exchange for no money at all.

## Product Description

### FREE Antivirus for All

BitDefender Free Edition is your chance to use one of the world's most effective antivirus engines for free!

BitDefender Free Edition uses the same ICISA Labs certified scanning engines found in other BitDefender products, allowing you to enjoy basic virus protection for no cost at all.

BitDefender Free Edition is an on-demand virus scanner, which is best used in a system recovery or forensics role. If you are on an "always-on" Internet connection, we strongly advise you to consider using a more complex antivirus solution.

### More Features

#### Virus scanning and removal

On demand scanning - Powerful scan engines ensure detection and removal of all viruses in the wild every time you need it.

#### Scheduled scanning

The Scheduler lets you plan ahead, and schedule full system/drive scans in the off hours, when you won't be using your computer.

#### Immediate scanning

With just a right click you can check your files and folders.

#### Skinable interface

You can express yourself, designing new interfaces, or you can use those drawn by others.

#### Quarantine

By isolating the infected files in quarantine, the risk of getting infected diminishes. You also have the possibility to send these files for further analysis to BitDefender Labs.

#### Reports

When launching a scan you may choose to create a report file where you can see statistics about the scan process.

#### System Requirements

System requirements:

- \* Pentium MMX 200 Mhz or higher processor
- \* Minimum 64MB of RAM Memory (128MB recommended)
- \* Minimum 40MB available hard disk space

Operating platform: Windows 98/NT-SP6/Me/2000/XP IE 4.0(+)
